Web designer & developer

I nurtured an early passion for digital stuff back when I was a kid – sleepless gaming nights and fiddling with mIRC scripting, coding away Flash and HTML websites, playing around with MIDI, experimenting with SSH, etc. That likely fueled my current journey through the web, design, and development – now encompassing broader concerns such as content strategy, branding, product design, online marketing, web design and front-end development.

Process

Mobile first, progr.
enhancement,
standards and
semantics,
interoperability.

Tools

Pen and paper, Sketch
or Adobe Illustrator,
Sublime Text,
Command line, and the
usual hint from Stack
Overflow.

Language

Portuguese (native)
Spanish (fluent)
English (fluent)
German (shamefully
beyond basic)

Interests

Riding boards and
bikes, reading novels
from long gone
bearded Russians,
exploring places.

Random

Scored 100% at the PIP
24 Plate Color Vision
Test – I'm *a bit*
colorblind.

Awesome people

Erik Spiekermann
(author of this very
typeface), George
Carlin, Brian May,
Gutenberg.
